

# AEGATS '18

Advanced Aircraft Efficiency in a Global Air Transport System

## SAVE THE DATE

TOULOUSE - 23-25 OCTOBER 2018

3AF, the French Aerospace Society, presents the 2nd edition of AEGATS, an international technology conference, on 23-25 October 2018, in Toulouse – France.

## Advanced Aircraft Efficiency in a Global Air Transport System

### OBJECTIVES

This conference will address both **aircraft design** and **air transportation operations perspectives** to prepare and shape a more efficient **Global Air Transport System**.

A **more efficient aircraft** means an aircraft which provides more and more Net Present Value. As a result, the aircraft design must enable, on the one hand to reduce dramatically the **fuel burn**, the **maintenance cost** and the cost of **ownership** in a shorter time to market, and on the other hand to increase revenue through **cabin services** and **enhanced aircraft operability**.

Urban mobility is it a dream or a new challenge? Question to focus on at this conference.

Of course, the **digital transformation** of the industry, including the intensive use of **big data** with new **business models** is a key enabler to achieve this. **Security** has not to be seen as a threat but as an opportunity for improvement.

### CONFERENCE TOPICS

The call for papers will be issued in December 2018, based on the mains following topics:

- AIRCRAFT DESIGN
- OPERATIONS
- DIGITAL TRANSFORMATION & AVIATION INFRASTRUCTURE
- SECURITY
- DOOR-TO-DOOR AIR MOBILITY

Please note the Conference date in your agenda...And see you at AEGATS'18.
